

Finding: "Poor Product Fit" and "No Decision Made" are tied as the top loss reasons (43 deals each), together accounting for nearly half of all 184 lost deals.

Why it matters: These two reasons point to different root causes: product-market mismatch vs. sales-process/urgency gaps, and each needs a distinct fix.

Recommendation: Sales enablement should audit lost-deal notes for "No Decision Made" opportunities to test urgency-building tactics, while product marketing should investigate "Poor Product Fit" losses for positioning or segment-targeting issues.
