

# Dashboard executive summary text

## Marketing Funnel

The sheet provides an overview of lead generation performance, tracking 2,090 total leads across channels, funnel stages, and response metrics.

- Partner Referral is the dominant lead generation channel with 757 leads, followed by Organic Search at 635 and Paid Social at 299.
- Of the 2,090 total leads, only 566 responded, yielding a median Response Rate of 27.08%.
- The largest concentration of leads sits at the Qualified Lead stage with 788, followed by Lead (434) and Prospect (384), suggesting strong progression through the funnel.

## Sales Pipeline

The sheet provides a comprehensive sales performance dashboard tracking 496 deals with an average deal value of 1,590.99, a 63.51% win rate, and an average closing time of 62.18 days.

- NovaPulse Ultimate achieves a 100% win rate, while NovaEdge Advanced lags at 51.11%, revealing significant product-level performance gaps.
- Sales rep performance varies dramatically, with Andre Moreau at a 100% win rate compared to Finn O'Brien at just 32%, highlighting a need for targeted coaching.
- Days to close fluctuated sharply, peaking at 93.12 days in Apr 2024 and dropping to 7.65 days in Oct 2024.
- Budget Constraints, Timing Not Right, and Competitor Won are the least frequent loss reasons, with 31, 33, and 34 deals respectively.

## Customer Health

The sheet provides a comprehensive overview of customer support operations, tracking 2,792 total tickets across product areas, accounts, sentiment, and resolution performance.

- ACCT-041 dominates ticket volume with 334 tickets, far exceeding the next highest accounts ACCT-035 (180) and ACCT-076 (176), signaling a potential at-risk customer.
- Average resolution time is 59.55 hours with minimal variation across priority levels—low (61.02 hours), high (60.48 hours), and medium (57.07 hours)—suggesting priority classification has little impact on resolution speed.
- Neutral sentiment dominates with 1,821 tickets, while negative sentiment sits at 630 and 58 tickets remain unresolved, representing a backlog needing attention.
- Notifications (567) and Analytics Dashboard (561) generate the most tickets by product area, while Data Pipeline (289) has the fewest.
