8. Establish a Quick Chat baseline

Which campaign source has the highest conversion rate?

MY ASSISTANT

Completed 5 steps

The Marketing Funnel sheet from the dashboard doesn't appear to have a direct "conversion rate by campaign source" breakdown in a single visual. However, the dashboard does show the **Leads by Channel** data. Let me look at what we can determine from the available data.

From the **Marketing Funnel** sheet of the NovaTech Revenue Intelligence Dashboard, the available campaign channel (source) data shows lead distribution : [load_capabilities](#)

Table		
Campaign Channel	Leads	
Partner Referral	757	
Organic Search	635	
Paid Social	(truncated)	
Email	265	
Direct Mail	134	

[View more](#)

The overall **Response Rate** is 27.08%, and the **Funnel Stage** breakdown shows leads progressing through Prospect → Lead → Opportunity → Closed Won stages.

However, the dashboard visuals don't include a direct **conversion rate broken down by campaign channel/source** in a single view. To get a more precise answer, I can try filtering the data by each individual campaign channel to calculate conversion rates per source.

How would you like me to proceed?

Break down conversion by channel

My Assistant

Ask a question...

NovaTech Revenue Inte... + Smart

What's our win rate for deals sourced from Partner Referral?

MY ASSISTANT

Completed 6 steps

Unfortunately, the **NovaTech Revenue Intelligence Dashboard** doesn't directly support filtering win rate by campaign channel (source). Here's what I found:

- The **Marketing Funnel** sheet tracks campaign channels (including Partner Referral) with metrics like leads, responses, and response rate — but does not include win rate.
- The **Sales Pipeline** sheet tracks win rates by region, sales rep, and product — but does not include a campaign channel dimension.

These two datasets aren't linked in the dashboard, so there's no way to slice deal win rates by the originating campaign source like "Partner Referral" directly from the available visuals.

Here's what I can tell you from the Marketing Funnel about **Partner Referral** : [Marketing Funnel](#)

- Leads generated**: 757 (the highest of all channels)
- Overall Response Rate** (across all channels): 27.08%

And from the Sales Pipeline, the **overall win rate** across all deals is 63.5% [Sales Pipeline](#).

Would you like to explore further?

My Assistant

Ask a question...

NovaTech Revenue Inte... + Smart

Usage is subject to [AWS Responsible AI Policy](#)

Which product area has the longest average resolution time?

MY ASSISTANT

Completed 10 steps

Mobile App has the longest average resolution time at **61.93 hours**, though it's closely followed by Notifications and Analytics Dashboard. Here's the full ranking from the **Customer Health** sheet, filtered by each product area :

[Customer Health](#) [Customer Health](#) [Customer Health](#) [Customer Health](#) [Customer Health](#) [Customer Health](#)

Avg Resolution Time By Product Area			
Product Area	Avg Resolution Time (hrs)	Total Tickets	
Mobile App	61.93	544	
Notifications	61.31	567	
Analytics Dashboard	61.28	561	
Data Pipeline	59.28	289	
Billing	56.97	305	
Authentication	54.19	529	

[View more](#)

The top three product areas (Mobile App, Notifications, and Analytics Dashboard) are all clustered closely around 61–62 hours, while **Authentication** resolves the fastest at ~54 hours — about **7.7 hours quicker** than Mobile App.

Would you like to explore further?

Which campaign source has the highest conversion rate?

ASK

Mark as verified

Interpreted as: Total Conversion Rate by Campaign Channel.

The total Conversion Rate across all campaign channels is 11,591.60, spanning 5 unique campaign channels. Among these, Partner Referral leads as the top campaign channel with a total Conversion Rate of 3,603.78. Looking at recent trends, the year-to-date total Conversion Rate as of January 25, 2025 experienced a significant decrease of 95.33% (-1,066.13), dropping from 1,118.4 to 52.27. Similarly, the month-to-date total Conversion Rate for January 25, 2025 declined by 71.63% (-131.96), falling from 184.24 to 52.27.
